

# Electric Vehicle Charger Mini-Grant Application

This grant is eligible for all commercial class rate payers. Those awarded the grant will receive up to \$2,500 after the installation of a Class 2 electric vehicle charging station behind the meter. CEC suggests considering the Clipper Creek as affordable, with good warranty, wet-locations rated, easily installed as a wall-mount or pedestal-mount and three years installed at Cordova Center: <https://store.clippercreek.com/hcs-40-ruggedized>
