4. PUBLIC HEARING ON PROPOSED TARIFF REVISIONS

Ezekiel Brown said he didn't agree with the heat pump rate and why it should be less than other forms of electric usage. His apartment has a heat pump and he cant imagine it being efficient to add an additional meter and he also doesn't think the usage will go over 1000 kWh. He also said that there are users in the harbor who find it more efficient to run a generator than to use power in the harbor.

Tyler Tulloch, with the Science Center, asked if any heat pumps were eligible for the heat pump rate. **Koplin** said it was for any heat pump system that has a compressor and refrigerant. **Tulloch** said the Science Center was supportive of the incentive rates.

5. ADJOURNMENT
